Together we can achieve more. In the case of the almost 5,000 lbs of freeze dried blackberries donated to Sustainable Connections by CBB Property Management, this sentiment certainly rings true. With a collaborative effort between six agencies including; Windwood Landscaping, Scrap It Stow It, Bellingham Public Schools, and the Miracle Food Network, we were able to pick up, transport, and store these berries for distribution among local hunger relief agencies.

The Food Recovery Program reduces food insecurity and addresses climate change by recovering and redistributing nutritious surplus food to neighbors in need. Thank you to everyone for your help in creating many purple smiles in our community.
