**Desired Start:** April 6, 2026

## About Us

Sustainable Connections advances a regenerative local economy that builds community, strengthens food systems, catalyzes climate solutions, and expands access to housing in NW Washington. We envision a region of informed and engaged communities where all people have access to fresh local food, live in affordable and healthy housing, make a living doing what they love, and have the lightest possible impact on the environment. We make this vision a reality by leading the transition to a regenerative local economy. Regenerative economies move away from extractive business models and work in harmony with nature and society to foster ecological restoration, community resilience, and social equity.

We strongly encourage applications from people of color, people from working-class backgrounds, women, LGBTQAI+ people, and those who are members of other marginalized communities. If you feel passionate about our efforts and believe that you have the skills to contribute to the growth of our organization, we want to hear from you - even if you do not believe you meet all the criteria listed here.

## Summary

The Commercial Energy Advisor plays a central role within the Energy & Green Building Program and its nationally recognized [Community Energy Challenge \(CEC\)](#), supporting energy efficiency and electrification projects across Northwestern Washington, with a focus on working with high-needs communities, including Latino, rural, and tribal communities, as well as nonprofits and community-serving organizations.

This is a hands-on, results-driven position that blends technical expertise with relationship-based work. The Commercial Energy Advisor conducts on-site commercial energy audits, develops practical recommendations, and supports clients in implementing

energy efficiency and electrification improvements in communities where they matter most.

**Key Responsibilities:**

- Conduct energy audits in a wide variety of commercial buildings according to ASHRAE Level 1 and Level 2 guidelines
- Analyze historical energy use patterns, identify anomalies, and determine whether they represent savings opportunities
- Prepare reports with customized recommendations for saving energy and electrification, including energy and/or cost savings calculations for individual recommendations
- Conduct follow-up meetings with building owners and facilities staff to answer questions and devise a plan for action
- Evaluate contractor bids for competitiveness, completeness, and incentive program eligibility; compare proposals and advise business owners on equipment installation options
- Complete quality assurance inspections for installed capital improvement projects and issue change orders to contractors when needed
- Track implemented projects using Salesforce and other databases
- Oversee Energy & Green Building program staff who conduct energy assessments to ensure best practices are followed and all staff are proficient in protocols
- Communicate with external partners including partner organizations, utilities, contractors, local government, and financial institutions
- Coordinate with Energy & Green Building program staff to support clients through the audit and implementation pipeline
- Collaborate with other Energy & Green Building program staff to design, refine, and improve program strategy, including project and program workflows, incentive structures, eligibility criteria, and contractor engagement and training.
- Act as a local, on-site program representative to customers and contractors, to encourage participation in the program and overcome barriers
- Offer advice and information to participants on other sustainable business practices and offerings, including Sustainable Connections' business membership
- Perform other related duties as assigned by the Energy & Green Building Program Manager

**Required Skills & Qualifications:**

- Passion for the mission of Sustainable Connections

- At least three years of relevant work experience and/or equivalent education, including demonstrated experience in commercial building energy efficiency
- An excellent technical skillset including familiarity with commercial building equipment and construction, the ability to perform energy savings calculations, and the ability to analyze utility usage patterns
- Ability to use multiple computer programs for data input and analysis, implementation tracking, communication, etc.
- Strength in establishing and maintaining strong working relationships with a variety of staff and community members
- Ability to distill and articulate complex information for varied audiences through outstanding verbal and written communication
- Proven competence in assessing priorities, managing a variety of activities in a time-sensitive environment, and meeting deadlines with attention to detail and quality
- Demonstrated ability to take initiative and work proactively, both independently and in teams
- Ability to work effectively in an open office environment
- Ability to safely perform routine energy audit activities, including using inspection equipment, climbing ladders, lifting up to 20 pounds, and working in confined spaces
- Ability to travel to audit locations in Whatcom, Skagit, Island, San Juan, and Snohomish Counties

#### **Desired Skills & Qualifications:**

- An academic degree in Energy Studies, Environmental Science, Engineering, HVAC Systems Management, or related fields
- Professional Engineer, Certified Energy Manager (CEM), Certified Energy Auditor (CEA), Energy Manager In-Training (EMIT), or similar professional qualification; OR eligible to sit for the CEM exam within one year
- Experience working within Latino, rural, and tribal communities
- Proficiency with Microsoft Office Suite, SharePoint, Asana, and Salesforce (or similar CRM and software tools)
- Extra consideration will be given to candidates who are bilingual in English and Spanish

#### **Compensation & Benefits:**

The starting annual hourly range for this position is from \$28 to \$32.35 depending on qualifications and experience. Benefits for first-year, regular, full-time employees (working 40hrs/week) include:

- 41 days of paid time off per year (inclusive of holidays, sick, PTO).
- \$650 per month individual benefit in lieu of health insurance benefits.
- Flexible work schedule.
- Professional development budget.
- Up to 3% SIMPLE IRA employer match to non-designated retirement plan.
- Mileage reimbursement and additional leave benefits.
- Supportive, inclusive, mission-driven work environment.

**To Apply:**

Email a cover letter, resume, and the contact information for three professional references, **all in one PDF file**, by email to [danielleh@sustainableconnections.org](mailto:danielleh@sustainableconnections.org) by the application deadline listed above.
