Call or check the business website for requirements of accepted materials

**only lead acid batteries accepted **only rechargeable batteries accepted*

WHY IS IT IMPORTANT TO RECYCLE AND SALVAGE CONSTRUCTION AND DEMOLITION MATERIALS?

Construction and demolition waste contributes to a large portion of landfill waste in Whatcom County, highlighting the need for adequate resources.

Recycling construction and demolition waste can conserve natural resources, minimize greenhouse gas emissions, and significantly reduce overall waste.

Proper management of this waste not only supports sustainable building practices but also creates local jobs in recycling and repurposing industries. Our goal with this toolkit is to provide you with the resources to efficiently recycle your waste.

Scan the QR code or visit the link to access our online toolkit
