The Energy and Green Building Program creates a healthy built environment for people and the planet. We are working to facilitate a local economy powered by the efficient use of clean, renewable, and secure energy as well as buildings that live lightly on, or are even restorative to, our environment. The Community Energy Challenge provides expert assistance to businesses and homes making energy upgrades, while events like the Green Building Slam bring our community together to envision a better future. Sustainable Connections is blazing a trail and helping to make our region a leader in clean energy and buildings.

HIGHLIGHTS & BENEFITS

ENERGY ACTION PLANS	Reports with recommendations for energy saving projects sent to multiple businesses per month
CLIMATE ACTION BOOK CLUB & ENERGY CLUB	Networking events for energy efficiency enthusiasts, contractors, and business owners - 9 meetings per year
ENERGY EVENTS & PRESENTATIONS	Past events include celebrations, local contractor parties, solar social hour, networking meetings, home & garden shows, neighborhood meetings, and technical workshops. We will engage with the community however it's safe to do so in 2022. Promotional materials and handouts provide additional exposure
GREEN BUILDING EVENTS & EDUCATION	Green Building Slam, Green Home Tours & Talks, and Building Decarbonization Tech Talks will continue for 2022
