The Energy and Green Building Program creates a healthy built environment for people and the planet. We are working to facilitate a local economy powered by the efficient use of clean, renewable, and secure energy as well as buildings that live lightly on, or are even restorative to, our environment. The Community Energy Challenge provides expert assistance to businesses and homes making energy upgrades, while events like the Green Building Slam bring our community together to envision a better future. Sustainable Connections is blazing a trail and helping to make our region a leader in clean energy and buildings.
